### [Temperature Transmitters](#)

#### **Temperature Transmitter 24/12 VDC**

Coming soon.... Please contact us if you need this information urgently. [\[Product Details...\]](#)

#### **Loop Powered Temp Transmitter Pt100**

DIN rail mounting, compact, loop powered temperature transmitters. Suited to industrial control and automation systems. Economical and convenient to use. Various models available covering the range -200°C to +650°C. [\[Product Details...\]](#)

#### **Thermocouple Transmitter**

Galvanic isolation between sensor, output and power supply >1,500 VAC. Cost effective pricing. Accuracy better than 0.3% or 0.5°C. Open thermocouple/sensor detection. Internal cold junction compensation. [\[Product Details...\]](#)

#### **Multi-Input Thermocouple Transmitter System**

Up to 32 thermocouple inputs. Individual galvanic isolation. Average temperature output. Individual isolated temperature outputs. Dual relay outputs for each input. RS485 RMF or Modbus serial communications. [\[Product Details...\]](#)
